PROFILE

Fresh Graduate in Informatics from Gunadarma University with a focus on AI Engineering and Web Development. Experienced in developing AI-powered web applications, integrating machine learning and deep learning models, and implementing AI features such as LLM-based chatbots. Proficient in Python and React, with hands-on experience developing and integrating AI models into web applications. Able to work independently or collaboratively, adapt to new technologies, and solve technical problems to deliver practical and efficient solutions.

EDUCATION LEVEL

Bachelor of Informatics, Gunadarma University *Sept 2022 - Aug 2026*
- GPA: 3.88/4.00

React & Back-End with AI Cohort, Asah Ied by Dicoding *Aug 2025 - Jan 2026*
- Final Score: 92.4/100
- Courses: Belajar Dasar Cloud dan Gen AI di AWS, Belajar Fundamental Aplikasi Web dengan React, and Belajar Fundamental Back-End dengan Javascript.

Machine Learning Engineer Cohort, Coding Camp Powered by DBS Foundation *Feb 2025 - Jul 2025*
- Final Score: 91.1/100
- Courses: Belajar Analisis Data dengan Python, Belajar Dasar AI, Belajar Machine Learning untuk Pemula, Belajar Fundamental Deep Learning, and Machine Learning Terapan.

JOB EXPERIENCE

Full-Stack Web Developer Intern *Jan 2026 - Mar 2026*
Badan Nasional Pencarian dan Pertolongan (BASARNAS)
- Developed MERAPAT, an enterprise web-based meeting room management system using React and Express.js, which digitized room booking, attendance, and reporting workflows across multiple stakeholders at BASARNAS.
- Built key features including room booking with double-booking prevention, QR attendance with digital signatures, real-time notifications, automated PDF/Excel reports, and activity agenda management for leaders.
- Collaborated with internal stakeholders by presenting development progress, gathering requirements and feedback, and implementing requested improvements throughout the development process.

PROJECT EXPERIENCE

Back-End Developer *Aug 2025 - Jan 2026*
Capstone Project | Asah Ied by Dicoding
- Built MaintEase, an AI-powered predictive maintenance web application for machine anomaly detection, failure classification, and health risk assessment.
- Developed an LLM-based maintenance chatbot using the OpenAI API, integrating the deployed machine learning model for AI-assisted diagnostics, risk assessment, and conversational ticket creation.
- Collaborated with the Machine Learning and Frontend teams to integrate the model, incorporate feedback, and deliver the project, achieving a final score of 90/100.

AI Agent Developer *Dec 2025*
Genesis Program | Teneo Protocol
- Developed an autonomous AI agent named CryptoSentinel using Go (Golang) to provide real-time crypto market intelligence, including price, sentiment, volatility, and market trend analysis.
- Integrated multiple CEX, DEX, DeFi, and on-chain APIs to aggregate real-time market data, support cross-exchange analysis and multi-chain portfolio tracking, and enable automated price alerts.
- Achieved 2nd place among nearly 300 AI agents in the Teneo Genesis Program for developing CryptoSentinel, a unified real-time crypto intelligence agent.

Machine Learning Developer *Feb 2025 - Jul 2025*
Capstone Project | Coding Camp Powered by DBS Foundation
- Developed a web-based disease diagnosis platform named Diagnosmart, supporting four medical categories including general illness, orthopedics, dermatology, and digestive disorders.
- Designed and trained a Convolutional Neural Network (CNN) using TensorFlow, and implemented an API with FastAPI to integrate the model for real-time predictions.
- Achieved a project evaluation score of 92/100, recognized for system functionality, predictive performance, and interface usability.

SKILLS & QUALIFICATIONS

- **Programming Languages:** Python, JavaScript/TypeScript, Go (Golang), PHP, SQL
- **AI & Machine Learning:** TensorFlow, Scikit-learn, PyTorch, Keras, LLM, RAG, Prompt Engineering, Text Embedding, Document Chunking
- **Web Development & AP**I: Next.js, React, Node.js, Express.js, FastAPI, REST API, Tailwind CSS.
- **Database:** PostgreSQL, Vector Databases (ChromaDB, pgvector)
- **Tools & DevOps**: Docker, Git, GitHub, Postman
- **Productivity Tools:** Microsoft Office (Excel, PowerPoint, Word), Google Workspace (Docs, Slides, Sheets).
- **Soft Skill:** Adaptability, Collaboration, Task Management, and Problem Solving
- **Certifications**: React & Back-End With AI on Asah Ied by Dicoding (2026), Machine Learning Engineer Cohort on Coding Camp Powered by DBS Foundation (2025)
